

GROUT FOR ENDS OF TIE RODS FOR PRESTRESSED GIRDERS

(5-2-94)

The ends of the tie rods used in the intermediate diaphragms shall be recessed and filled completely with non-metallic, non-shrink grout. All recesses shall be filled in a neat and workmanlike manner and the grout shall match the neat lines of the girders.

The non-metallic, non-shrink grout shall meet the approval of the Engineer.

430-6

~~No separate measurement or payment will be made for this work and the entire cost of this work shall be included in the unit contract price bid for prestressed concrete girders.~~
